

## Resources for Transitioning to Online Classes

Acue

<http://acue.org/online-teaching-toolkit>

These free resources are divided into six key topic areas for teaching remotely:

1. Welcoming students to the online environment
2. Managing your online presence
3. Organizing your online course
4. Planning and facilitating quality discussions
5. Recording effective microlectures
6. Engaging students in readings and microlectures

Crowdmark

We are offering free access to our grading and analytics platform until May 31, 2020.

If you are a current customer and need to extend your license to other departments we will be happy to accommodate you.

Crowdmark provides two distance education workflows that can help mitigate the current pressures on our communities by enabling educators to offer assessments to students remotely, easily, and efficiently.

[Assigned Assessment Workflow: With our Assigned Assessment Workflow, educators can assign assessments that students can write anywhere, anytime, and submit for evaluation with the click of a button.](#)

[Remote Proctor Workflow: With our Remote Proctor Workflow, educators can easily manage both make-up and remote examination sessions. The proctor is invited to an exam via email, logs in, downloads and prints the exam. When the exam is completed they scan the exam and upload it to Crowdmark for grading.](#)

EDUCAUSE

Pisces (Net Tutor)

**Any school, college, or university that wishes to use our Pisces learning platform may do so, free of charge, through the end of spring:**

Send an email to [spring2020@linksystems.atlassian.net](mailto:spring2020@linksystems.atlassian.net)

SmarterServices

**We are working with our current clients to address concerns and evolving needs by facilitating large scale proctoring deployments including automated proctoring, distributed face-to-face proctoring, and managing written exams that cannot be moved online**
